WEB DEVELOPMENT

Practicum - Week 4.2

Exercise guidelines

📁 Folder structure

For this exercise, **create a new folder called week 4.2**. in your web development folder.

Only put the files necessary to complete the exercise in here.

DO NOT add any source materials in this folder (screenshots, pdf files, …)

📤 Submission deadline

The deadline for this exercise is **Sunday, October 17th, 23:59.**

📤 Submission rules

Submission rules are listed in the week 1.1 briefing

Specifics

Fonts:

Use the following Google fonts in your solution: "**Pacifico**" and "**Roboto**"

Tips and tricks:

1. Critically evaluate the content, do not automatically assume every exercise is the same.
   Hint: **no headers other than an h1 are used in this exercise**. This is a form. Forms have **different semantic** containers!

2. The following items are mandatory: **email, favourite movies, request**

3. The **email** box displays **an example of what value is expected**. When the user starts to type in the box, **that example disappears**.

4. The email address supplied should be **valid** (no JavaScript!)

5. Where are you from? has three options: Earth, Venus en Mars. The user **must make a selection out of these three items**

6. The favourite movie list gives **a suggestion of movies.** It is however possible to supply a **custom value**

7. One can select elves or reindeer, **not both**

8. One can select **any number of Christmas decorations**, **none** is a valid option.

9. The Christmas request is **a multi-line response**

10. Try using a **percentage value** for the background image of the christmas tree. If you give the h1 a line-height of 220%, you'll be able to comfortably fit the image. Just keep in mind this only works when the text does not span more than a single line

11. Form components may look different in each browser!

12. As usual: margins and spaces between elements can be **determined by approximation**, unless otherwise specified. They'll always increase/decrease by 0.25rem (so margins/paddings are usually 0.5, 0.75, 1, 1.25, … rem)

Used colours / fonts:

See **colour palette.txt** en **colour palette.png** for colour usage

Anything not specified below is to be derived from source material or specified by approximation.

- Title header: 4rem
- Form: 65% width
- Form elements: 1rem rounded corners (all directions), 3% padding all directions
- Labels: 1% space below, 1.3rem font size
- Input fields: 2.25rem height, 5px rounded corners (all directions), 3% space below, 1.2 rem font size, 0.0625rem space between each letter, stretch to the maximum size of their container
- Submit button: 1.3rem font size, lighter font width, lowercase text only
